# What makes AeroGCS GREEN amazing?

**Efficient Workflow Planning:** Plan spraying quickly, saving time.

**Field Mapping and Mission Execution:** Easily execute multiple missions with mobile devices or drones.

**Real-Time Monitoring:** Monitor drone and pilot locations simultaneously.

**Flexible Mission Planning:** Plan on mobile or cloud seamlessly.

**Obstacle Avoidance and Field Protection:** Ensure hassle-free spraying.

**Flight Control:** Maintain altitude and flow rate control.

**Comprehensive Map Centralization:** Auto-center for a full view during flight.

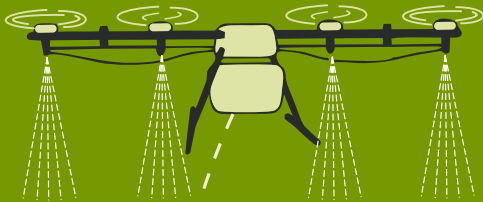

**Accurate Dosage Calculation:** Calculate speed and dosage precisely.

**Efficient Mission Management:** Track and resume missions easily.

**Ease Enhancements:** Quick help access, boosted sync, accurate calibration, transparent display, and seamless registration.

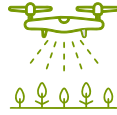

# What does it offer to Improve Lives?

## Optimization of resources

Promoting limited usage of water consumed as well as liquid used for the spraying mission with effective spraying practice.

## Equal and uniform spraying

Permits to spray in equal and uniform amount only as much as needed, resulting in better produce quality.

## Systematization to accomplish more

Farm work and task management features helps to organize and align tasks from anywhere, totally remotely.

## Nutritional produce

Optimization with precision spraying tools will enable to produce healthier from field resulting in producing nutritious.

## Time saving

AeroGCS Green is a simplified GCS for Agriculture which can be easily set up and is easy to use, designed to save your time consumed.
